Anthony Villalobos

San José, Costa Rica • tonyiish223@gmail.com • +506 64484300 • github.com/Tonysk8cr

Professional Summary

Computer Science Engineer with experience in enterprise support, incident management, troubleshooting, automation, and backend development. Skilled in Python, ServiceNow, Azure, REST APIs, and AI-enabled solutions. Experienced in root cause analysis (RCA), escalation management, ITSM processes, and developing automation workflows that improve operational efficiency. Strong foundation in software engineering, cloud technologies, data processing, and machine learning.

Education

Universidad Hispanoamericana — San José, Costa Rica
Bachelor of Science in Computer Science — Expected May 2027

Certifications

ServiceNow CSA, Scrum Foundation Professional, Microsoft Certified: Azure Fundamentals, Infosys Cyber Security foundations, Infosys Fundamentals of cryptography

Experience

ServiceNow — Heredia, Costa Rica
Technical Support Engineer — September 2025 – September 2026

- Resolved approximately 25 Tier 2/Tier 3 technical cases per week involving JavaScript, REST APIs, backend services, AI workflows, and platform integrations across enterprise ServiceNow environments.
- Maintained a perfect CSAT rating throughout the year while consistently managing one of the lowest active case queues within the team.
- Performed incident management, root cause analysis (RCA), log analysis, and problem investigation using Splunk, SQL, Bash, and internal observability tools to identify service-impacting issues.
- Partnered with engineering teams to investigate escalated cases, document findings, and contribute to issue resolution and post-mortem activities.
- Investigated issues related to ITSM, integrations, Flow Designer workflows, Business Rules, Script Includes, GlideRecord operations, CMDB records, and platform configurations.

Tools: ServiceNow ITSM, Flow Designer, Business Rules, Script Includes, GlideRecord, CMDB, JavaScript, SQL, Bash, Splunk, REST APIs, JSON, Linux, Incident Management, RCA

Infosys — San José, Costa Rica
Sr. Technical Process Executive — April 2024 – September 2025

- Automated operational and support processes using Python and ServiceNow to reduce repetitive manual work and improve team efficiency.
- Administered Microsoft Azure and Microsoft 365 environments, supporting IAM operations including account provisioning, RBAC assignments, MFA support, and access management requests.
- Managed Active Directory users, groups, and permissions while following least-privilege and identity governance best practices.
- Investigated and resolved incidents involving enterprise applications, endpoint devices, connectivity, authentication, and access to corporate resources.
- Supported major incident processes, ensuring stakeholder communications and status updates were delivered within established response timelines.

Tools: Python, PowerShell, Microsoft Azure, Microsoft 365, Active Directory, Intune, Windows Server, IAM, RBAC, MFA, ServiceNow, Automation

Foundever San José, Costa Rica
Technical Support Agent / Subject Matter Expert (SME) January 2023 – March 2024

- Provided technical support for Verizon business customers, handling approximately 30 customer interactions per day involving internet connectivity, Wi-Fi networks, gateways, telephony services, and mobile devices.
- Achieved Top Performer NPS rankings for 4 consecutive months through effective troubleshooting and customer issue resolution.
- Performed incident triage, escalation management, and technical troubleshooting while maintaining service quality standards.
- Diagnosed TCP/IP, wireless networking, and endpoint issues using structured troubleshooting methodologies and technical documentation.
- Mentored support agents as a Subject Matter Expert (SME), helping teams maintain an overall NPS score of 8 compared to the typical 6–7 organizational average.

Tools: TCP/IP, Wi-Fi, Routing, DNS, Android, iOS, CRM Systems, Ticketing Systems, Incident Management, Technical Troubleshooting

Projects

LETW – Costa Rican Sign Language (LESCO) Translator Open Source

- Developing an open-source machine learning application that recognizes Costa Rican Sign Language (LESCO) gestures and translates them into text.
- Built data collection, preprocessing, validation, and feature engineering pipelines using Python, MediaPipe, OpenCV, NumPy, and pandas.
- Developed and trained TensorFlow LSTM models for sequential gesture classification and computer vision-based action recognition.

Technologies: Python, TensorFlow, LSTM, MediaPipe, OpenCV, NumPy, pandas, ETL, Feature Engineering, Computer Vision, Machine Learning

Data Processing & AI/ML Projects

- Developed Python-based data pipelines to ingest, clean, validate, transform, and analyze structured and unstructured datasets.
- Applied feature engineering, data validation, exploratory analysis, and machine learning techniques using industry-standard libraries.
- Worked extensively with Jupyter, pandas, NumPy, and machine learning workflows to support experimentation and model development.

Technologies: Python, pandas, NumPy, Jupyter, NLP, LLMs, Prompt Engineering, Data Pipelines, ETL, Machine Learning, APIs

Backend & Enterprise Software Development

- Developed academic and personal software projects using Python, Java, C#, JavaScript, PHP, and SQL following SDLC and Agile practices.
- Designed backend functionality including CRUD operations, authentication workflows, business logic, and REST API integrations.
- Utilized Git, GitHub, Postman, and API testing workflows during software development projects.

Technologies: Python, Java, C#, JavaScript, PHP, SQL, PostgreSQL, MySQL, SQL Server, REST APIs, Postman, OOP, SDLC, Git, GitHub

Skills

- Skills: Python, PowerShell, SQL, JavaScript, REST APIs, ServiceNow ITSM, Azure, Microsoft 365, Active Directory, IAM, RBAC, MFA, Linux, Git, GitHub, Splunk, TensorFlow, NLP, LLMs, ETL, Machine Learning, Agile/Scrum.
- Languages: Spanish (Native), English (Professional)
