

Anthony Villalobos

San José, Costa Rica • tonyiish223@gmail.com • +506 64484300 • github.com/Tonysk8cr

Professional Summary

Software Engineer with experience in Python-based development, data processing, and production systems. Skilled in building backend workflows, working with APIs, and analyzing unstructured data. Hands-on experience with machine learning and NLP projects, including data pipelines and model integration. Strong foundation in debugging, system reliability, and collaborative engineering practices, with a growing focus on AI-assisted data extraction and automation.

Education

Universidad Hispanoamericana

San José, Costa Rica

Bachelor of Science in Computer Science

Expected May 2027

Coursework focused on Software Engineering, Artificial Intelligence, Data Analysis, Database Systems, Computer Networks, Operating Systems, Computer Architecture, System Administration, and Full-Stack Development using Python, Java, JavaScript, C#, and SQL.

Experience

ServiceNow

Heredia, CR

Technical Support Engineer

September 2025 – Present

- Resolved complex customer issues by analyzing logs, SQL queries, and system behavior across multiple platform components
- Managed a high-volume support queue while maintaining strong customer satisfaction and response times
- Troubleshoot JavaScript, REST APIs, web components, backend services, and AI-driven workflows within the ServiceNow platform
- Investigated production incidents using Splunk, Bash, SQL, and internal diagnostic tools to identify root causes and implement solutions
- Supported multiple customer workspaces, ensuring platform stability, performance, and security
- Collaborated with engineering teams to resolve escalated issues and improve product reliability
- Documented solutions and contributed to the internal knowledge base, reducing future resolution time
- Educated customers on platform best practices and proactively identified recurring issues to improve product adoption

Tools: ServiceNow Platform, JavaScript, SQL, Bash, Splunk, REST APIs, AI Workflows, JSON, Linux, Git

Infosys

San José, CR

Sr. Technical Process Executive

April 2024 – September 2025

- Supported enterprise production environments by monitoring systems and resolving incidents to maintain service availability
- Participated in incident response and coordinated with multiple teams to resolve high-impact outages
- Automated operational tasks using Python, improving efficiency and reducing manual effort
- Assisted in change management and system updates in controlled production environments
- Managed Active Directory users, groups, and devices while performing access reviews and permission management
- Administered Microsoft Azure and Microsoft 365 environments, supporting user identities, devices, and enterprise services

Tools: Python, Microsoft Azure, Microsoft 365, Active Directory, Intune, VPN Technologies, Windows Server, PowerShell, ServiceNow

Foundever

San José, CR

Customer Service Agent / Subject Matter Expert (SME)

January 2023 – March 2024

- Provided technical support for Verizon residential and business customers, troubleshooting internet connectivity, wireless networks, telephony services, gateways, and Android/iOS devices
- Resolved complex technical issues while maintaining high customer satisfaction and accurate case documentation
- Mentored and trained new technical support agents, improving troubleshooting skills, logical thinking, and team performance
- Collaborated with leadership to enhance technical knowledge sharing and overall customer experience

Tools: Android, iOS, TCP/IP, Wi-Fi, Routers, Gateways, CRM Systems, Technical Troubleshooting

Projects

Open Source Software Development

November 2024 – Present

- Built Python-based data processing pipelines to ingest, clean, and transform structured and unstructured data (text, PDFs, APIs)
- Developed NLP and machine learning models for classification and information extraction tasks
- Implemented backend services and APIs to serve ML models and support data workflows
- Experimented with LLM-based approaches for parsing and extracting structured information from documents
- Designed tools for dataset generation, preprocessing, and validation to improve model performance
- Worked on computer vision and NLP solutions, including Costa Rican Sign Language (LESCO)

Skills

Programming: Python, JavaScript, Java, C#, SQL, Bash

Backend & APIs: REST APIs, JSON, API Integration

Databases: PostgreSQL, SQL Server, MySQL, MongoDB (Basic), Redis (Basic)

Cloud & Enterprise: ServiceNow, Microsoft Azure, Microsoft 365, Active Directory, Intune

Monitoring & Debugging: Splunk, Log Analysis, SQL Debugging, Incident Response, Root Cause Analysis

Tools: Linux, Git

AI & Data: Machine Learning, NLP, Computer Vision, Data Pipelines, LLM Applications

Languages: Spanish (Native), English (Professional)
