Experience

Infosys BPM

Senior Technical Process Executive

April 2024 – Present

San José, Costa Rica

- Provided IT support to end users and assisted with infrastructure-related tasks, ensuring no critical interruptions in internal tools and systems.
- Developed automation scripts and internal tools using Python, significantly improving team efficiency and the quality of support delivered to both users and the client.
- Created and maintained technical documentation to keep the team aligned with infrastructure updates, tools, and internal processes.

Foundever

Technical Support Agent

January 2023 – March 2024

San José, Costa Rica

- Provided technical support for a major U.S. telecommunications client, focusing on network and telephony systems for both residential and business customers.
- Diagnosed and resolved connectivity, configuration, and hardware issues, ensuring minimal downtime and high customer satisfaction.
- Assisted in training and onboarding new team members by sharing knowledge of tools, procedures, and best practices.
- Maintained detailed documentation of incidents and resolutions, contributing to continuous improvement of support processes.

Projects

Action Detection Model | *Python*

- * Developed an AI-based action detection model using MediaPipe, OpenCV, and TensorFlow. This model recognizes actions with good accuracy. It also allows the user to train it with limited data.
- * Built a user-friendly console application to make the model accessible without programming knowledge, promoting AI understanding.

Web-Based Ticketing System | *PHP, Bootstrap, MySQL*

- * Developed a ticket management system to allow users to report and track technical issues.
- * Used PHP and MySQL for the backend and Bootstrap to build a responsive user interface.
- * Implemented features such as user authentication, ticket status tracking, and admin controls.

Doctor Appointment Scheduler | *C# (Console Application)*

- * Built a console-based appointment scheduling system in C# for a local medical clinic.
- * Implemented patient registration, appointment booking, and time slot validation functionalities.
- * Applied object-oriented principles to structure reusable and maintainable code.
- * Delivered the working prototype to Dr. Salas' clinic for operational use.

Technical Skills

Languages: Python, C#, PHP, HTML/CSS/JavaScript, SQL

Developer Tools: VS Code, Apache Netbeans, JetBrains IDEs, MySQL

Technologies/Frameworks: Linux, GitHub, Active Directory, ServiceNow, Jira
